28 Dec. 70

As you may recall, the DCI about September asked for a briefing on how space is managed. We worked up a briefing in some detail but never had an opportunity to present it as the DCI was heavily involved in other matters. Also a number of other space developments occurred which tended to obviate the need for this briefing.

Attached are some reference cards I planned to use. [redacted] STA
Soy Services have a number of exhibits we selected.

I don't think this will be raised as a requirement but you should keep this in mind.
